Professional Summary

Mid-Level AI Agent Analyst and Machine Learning Engineer focused on SaaS optimization in the financial sector. Currently, I architect and deploy AI-based solutions within the vhsys Data team, translating complex data into accessible, high-impact business intelligence for end users. Utilizing modern AI pipelines—including Python, RAG architectures, Prompt Engineering, and MLOps—I build scalable and automated systems tailored for complex environments. My mission is to merge advanced engineering and strategic innovation to drive automation, efficiency, and robust business outcomes.

Education

IESB	Brasília, DF
Data Science and Artificial Intelligence - Bachelor's Degree	08/2022 – 07/2027
University of Brasília	Brasília, DF
Computer Engineering - Incomplete Bachelor's Degree	08/2018 – 07/2022

Professional Experience

vhsys - Business Management System	Brasília, DF
AI Analyst	10/2025 – Present
- I design and develop Artificial Intelligence solutions based on multi-agent architectures to automate business management processes and improve user experience. Multi-Agent Architecture: Developed orchestrator agents that act as intelligent routers to analyze requests and direct them to the appropriate specialist agents. RAG Agent: Created a virtual assistant for customer support to answer complex questions regarding ERP usage. Text-to-SQL Agent: Built an analytical agent that interprets natural language and performs dynamic database queries for real-time insights. Action Agents: Implemented system-integrated agents to execute actions, automate tasks, and reduce user friction. Infrastructure & API: Managed cloud provisioning and deployment, developing the API that connects the main vhsys system with the AI ecosystem.	
IZE Gestão Empresarial	Brasília, DF
Junior Data Scientist	04/2024 – 10/2025
- I develop Generative Artificial Intelligence solutions and autonomous agents to automate financial analysis tasks. - I structured and maintain Data Engineering pipelines with Docker and Airflow, automating ETL processes to ensure the integrity and efficient processing of financial data. - I perform complex data analysis of ERP systems, transforming them into insights for Business Intelligence reports that support strategic decision-making.	
Le Saison	Brasília, DF
Data Science Intern	08/2022 – 01/2024
- I implemented Machine Learning models for predictive sales analysis, using Python and Scikit-learn to improve the accuracy of inventory forecasts. - I conducted data analysis projects to identify consumer trends, providing insights that guided marketing campaigns and product selection. - I collaborated in the creation of dashboards and Business Intelligence tools, centralizing sales and operational data for company performance analysis.	

Data Intelligence Center • ANEEL

Brasília, DF

Innovation Intern

02/2022 – 07/2022

- I applied Natural Language Processing (NLP) algorithms for data mining tasks in regulatory documents, automating the classification and extraction of information.
- I participated in the prototyping of Artificial Intelligence solutions to enhance the analysis of large volumes of data, strengthening the oversight of the electrical sector.

IEEE Computational Intelligence Society Student Chapter UnB

Brasília, DF

Academic Member

04/2019 – 05/2022

- I collaborated on projects applying Machine Learning algorithms and Deep Learning neural networks to solve problems with social impact, contributing to winning the "Outstanding Chapter of the Year" award.

Líder Contabilidade Ltda.

Brasília, DF

Intern

12/2017 – 08/2018

- I maintained data within the company's systems, assisting with clients' financial management.

Technical Skills

Programming: Python, SQL, C

Artificial Intelligence: LLM, RAG, Langchain, Natural Language Processing (NLP), Machine Learning, Deep Learning, Prompt Engineering, API Development

Data Engineering: Docker, Apache Airflow, ETL Pipelines, Databases, Web Scraping, APIs, Spark, GCP, MLOps

Data Analysis: Predictive Analysis, Exploratory Data Analysis (EDA), Business Intelligence, Data Mining

Languages

English (Full Professional)

Portuguese (Native)

French (Basic)

Spanish (Basic)

Certifications and Courses

- Google Data Analytics Professional Certificate
 - Supervised Machine Learning: Regression and Classification - Coursera
 - Machine Learning for Digital Business - Alura
 - CC50: Introduction to Computer Science - Harvard
 - Python 3 - Udemy
 - Chatbot Part 1: Getting Started with Smart Conversations using Watson
 - Data Analytics: Machine Learning in Digital Marketing
-

Bootcamps

- Machine Learning Bootcamp - IGTI
 - Database Experience - DIO
-

Exchanges

- 2019 – 2020 ILAC Toronto, Canada
-

Awards

- Outstanding Chapter of the Year, IEEE CIS
